

DROP BOX PANEL

Modular Acoustic Ceiling System

Product Overview

Drop Box Panel is a modular acoustic ceiling system featuring a clean geometric grid with integrated vertical baffles that create depth and shadow. Designed for modern interiors, it enhances acoustic comfort and architectural aesthetics.

Key Features

- High-performance sound absorption (with plenum)
- Lightweight and easy to install
- Clean architectural design
- Modular and scalable system
- Sustainable material composition

Technical Specifications

Parameter	Specification
Module Size	600 × 600 mm
Total Depth	144 mm
Panel Thickness	9 mm
Weight per Unit	~1.1 kg
Weight per m ²	~3.5 kg

Acoustic Performance

Direct mount (no air gap): NRC ≈ 0.30
With 200 mm air cavity: NRC ≈ 0.80

Warranty - 5 Year

Fire Ratings

DICOUSTIC
Panels has been
evaluated using
the following
test method

EN 13501-1 :2018
Class B-s2,d0

*ASTM E84-2018
